The average percentage of liabilities to depositors available on the date of the report is 38 1-3 per cent. The increase of resources has been remarkable, being 33 per cent greater than eleven months since. During the last eleven months the general banking business of the state has increased rapidly. The deposits in state banks have grown more than \$60,000 while the loan and discount account has increased \$117,000. There is a brisk demand for money and we may within a short time expect a large increase of deposits by reason of the heavy wool clip of the state being disposed of and returns made for it.
